Does Fear Lead to the Dark Side?

Simon Labarthe

2026-10-26

Quarto's default look: no layout options at all, only `format: pdf`. Text is Markdown, numbers come from R chunks, and references from `references.bib`.

Introduction

This is a paragraph in **Markdown**: *italics*, **bold**, `code`, and a citation (Wilson et al. 2017). A narrative citation: Marwick et al. (2018) argue that a project should be a package. Section describes the data, Table 1 summarises it and Figure 1 shows the main result.

Data and Model

The example data has 87 characters. This number is written by R when the document is rendered: it never goes stale.

Table 1: Descriptive statistics

Variable	N	Mean	SD
Height	81	174.6	34.8
Mass	59	97.3	169.5
Birth year	43	87.6	154.7

We estimate Equation 1 by OLS.

$$Y_i = \alpha + \beta X_i + \varepsilon_i \tag{1}$$

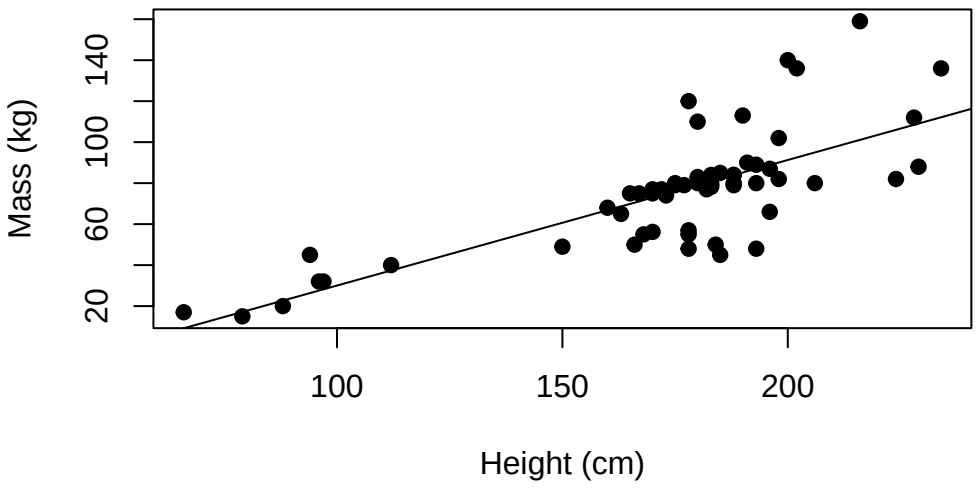

Figure 1: Taller characters are heavier

Results

One more centimetre is associated with 0.61 kg more.
